Two U.S. Ships Strafed At Tsingtao

State Department's Protest To Taipei

Washington, Feb. 27.—Two American merchant ships were attacked from air today in the harbour of Communist-held Tsingtao and the State Department revealed that it has protested to the Chinese Nationalists against the "lawless attack" on United States shipping.

The first reports did not identify the planes involved in today's bombing and attacks on the American ships, Flying Clipper and Pioneer Dale, but it was presumed here that they were Nationalist aircraft trying to enforce the blockade of the Communist-held mainland.

The United States Lines announced at the earliest possible date on Monday that its ship, Pioneer Dale, was being attacked and strafed while at anchor in the harbour of Tsingtao. The ship was not damaged but the attack was a "lawless" one, the State Department said. The ship was not damaged but the attack was a "lawless" one, the State Department said. The ship was not damaged but the attack was a "lawless" one, the State Department said.

TRIFLING DAMAGE
The United States Lines said the damage to their ship was "trifling." They said the ship was now proceeding to Tokyo according to instructions.

SURVIVAL TRIAL COMPLETED
London, Feb. 27.—Sir Britton, who was in charge of the survival trial, announced that the trial was completed. The trial was a success, he said, and the participants were all well.

FULLY RESPONSIBLE
The note said, "The United States government holds that the Chinese (Nationalist) government is fully responsible for the violation of American rights on high seas and expects to receive satisfaction."

Berlin's 5-in Snowfall

Manila, Feb. 27.—The worst snow in years blocked highways through out the Russian Zone of Germany today and slowed traffic on the international autobahn to Berlin to a bare trickle.

Berlin struggled to dig itself out from under a five-inch snowfall which drifted into midtown and tied up traffic. The drift, ranged from one to three feet deep. Old residents said it was the heaviest snowfall they could remember in Berlin.

It ports from the East Zone said there were very high snow drifts throughout the state of Thuringia. Trucks and cars were warned against travel on any of the superhighways in that zone. It was impossible under such conditions, to estimate the effect of Russia's little blockade of Berlin.—United Press.

Testimony At Mercy Killing Trial

Manchester, New Hampshire, Feb. 27.—A nurse who witnessed the alleged mercy killing by Dr. Hermann Sander testified today that the patient was alive when the doctor pumped air into her veins.

She was Miss Elizabeth Rose, 21, who was at the bedside of Mrs. Abbie Barrows, 59, cancer patient whose death Dr. Sander is accused of hastening.

Testifying for the prosecution, Miss Rose described how Dr. Albert Sander of the hospital staff examined the woman and found no pulse and heard no signs of life with a stethoscope. However, after he left the room, she added, she heard the patient cough.

Mr. Barrows was gasping after Dr. Sander entered the room, witnesses continued. She said she heard a "booster pump" start after she noticed Dr. Sander putting an empty syringe into the patient's skin. She testified that she then saw Dr. Sander start to push the plunger down. He said, "Air in the veins would act like an embolism."

Witnesses then described how Mrs. Barrows and a nurse were unable to get a pulse from Mrs. Barrows at about 11 a.m. Dr. Sander, staff physician at Hillsborough County Hospital, who was passing the door of the room where Mrs. Barrows lay. Dr. Sander was also unable to get a pulse or detect signs of life with a stethoscope.—United Press.

Nationalisation To Be Left Out Of King's Speech

NEW CABINET MAY BE ANNOUNCED TODAY

London, Feb. 27.—The Prime Minister, Mr. Clement Attlee, will discourage any reference to further nationalisation in the King's Speech outlining the Government's programme to the new Parliament, it was learned from a usually reliable source today.

With Labour's majority on a knife edge, the Prime Minister and his senior Ministers have decided that the Speech will not mention controversial legislation.

To introduce the business of the new Parliament on a high note of challenge might force an immediate test of strength between Labour and Conservatives before the new Left-wing administration, with its tiny majority, had got into its stride.

While Mr. Attlee continued his talks with the Inner Cabinet this afternoon on the reconstruction of the Government, Election results still coming in reduced Labour's narrow overall majority in the House of Commons to seven. Two Conservatives and a Liberal respectively won in three delayed North Scotland results announced today. The Labour Party now holds 315 seats to the Conservatives' 296, Liberals' nine and Independents' 3.

Mr. Attlee's reconstructed Government is expected to be announced either tomorrow or Wednesday. He was seen by King George tonight and intended to submit informally to him Cabinet and other Government changes already settled.

The list of new appointments, for necessarily extensive, may be announced in two instalments though the Prime Minister hopes, if possible, to list all the changes in a single statement.

Quarters near the Government tonight made it clear that Mr. Attlee had received no visits from leaders or representatives of the Conservative or Liberal Parties.

Tories Win Another Seat

State Of Parties
London, Feb. 27.—The Conservatives have won another seat in the British General Elections, Lord Malcolm Douglas-Hamilton capturing Inverness with a majority of 4,820 over his Labour opponent.

The votes cast were as follows:
Douglas-Hamilton, Conservative, 16,056.

Captain D. N. Thompson, Labour, 11,236.

J. M. Bannerman, Liberal, 8,023.

Earlier, the Conservative candidate retained his seat in the Argyll division with a majority of more than 10,000 votes. In the Orkney and Shetland constituency, however, the Conservative candidate lost the seat to his Liberal opponent.

84 PER CENT POLL

Today's polling brought votes for the main parties up to: Labour 12,248,957; Conservative 12,450,403; Liberal 2,634,482.

The aggregate vote recorded for the British General Election was tonight given as 28,700,000—a poll of 84 per cent.

The state of the parties tonight stood as follows:
Labour 315
Conservatives 296
Liberals 9
Irish Nationalists 2
Independent Liberals 1

The Speaker 623
The result still to come will be from Moss Side, Manchester, where polling will be on March 9. The Election here was postponed when the Conservative candidate died shortly before polling day.—Reuter.

Airliner Crashes

Prague, Feb. 27.—A Czechoslovak Airlines plane crashed today in Moravia and conflicting reports said between five and 27 persons were killed.—United Press.

Peasants In Revolt

Catanzaro, Italy, Feb. 27.—Landless and unemployed peasants of Southern Italy today seized 20,000 hectares (50,000 acres) of uncultivated estates in a new flareup of last autumn's still smouldering "peasant revolt."

The latest seizures were made in the early hours of this morning on rolling hills and flat yellow-brown plains which border the Gulf of Taranto.

In the dim, grey light of dawn, lashed by rain which drove in from the sea, caravans of peasants wound their way from hill-top villages. In some cases they went back on to land which they had seized and then given up again last year after promises of "reform."

A peasant leader said today that local landowners had promised to apportion land and, where this was not possible, to give employment. These promises had not been kept, he said. So far, the peasants have ignored police orders to leave the land thus seized.—Reuter.

Sino-Soviet Treaty Moscow Came Off Second Best

LONDON EXPERTS' OPINION

London, Feb. 27.—A line by line study of the new Sino-Soviet treaty has convinced official quarters here that Moscow came off second best in its dealings with the Chinese Communist leader, Mao Tse-tung.

Experts who have been comparing the new treaty with the 1945 Sino-Soviet pact said that in many respects the new one represents a Russian climb down without precedent in recent foreign relations.

One expert said the new treaty differs from its forerunner in some important respects which should dispel any doubts that China must end its century of a Soviet satellite.

It was pointed out that the 1945 treaty was a pact between Russia and China to wage war against Japan whereas the new treaty is a pledge of co-operation to bring about a Japanese peace settlement.

Leopard Still At Large

Lion Dogs Fail To Pick Up Scent

Oklaoma City, Feb. 27.—The search for the wild escaped leopard—which may be drugged with sleeping medicine—moved out of Lincoln Park Zoo today after seven "lion dogs" from Colorado failed to pick up the scent in the area.

Some 100 hunters who reported for today's search hoped that the big cat might be slowed down by a narcotic-laced chunk of horse meat left near the leopard's enclosure. The hunt was gone on Monday morning.

The Zoo director, Mr. Eyster, said it might have been taken by raccoons or skunks but he added, "I hope the leopard got some of it." He added that "the cat ought to be pretty hungry by now."

Dogs handled by professional hunters were led into the 20-foot deep pit from which the leopard leaped to freedom on Saturday and sniffed eagerly. Then the dogs nosed around the zoo area for 45 minutes but the scent was as elusive as the black spotted cat itself.

GOAT TRAP ADVISED

City Park superintendent R. R. Murphy said the hunt was bogged down for lack of leads. He said, "As far as tips are concerned we are worse off than yesterday." He said three reports of the leopard's whereabouts today proved groundless. He conceded, "The leopard is just smarter than we are."

A wild animal trainer for the world's biggest circus advised leopard hunters in Oklahoma City today that they need a "goat" to lure the cat.

RIGHTS SURRENDERED

According to the old treaty Russia had 30 years of joint rights in the railway but according to the new agreement the must surrender them by 1953. The 1945 treaty gave Russia 30 years joint use of Port Arthur as Naval base with full control over the Chinese civil administration and full defence responsibility. The new treaty says that this, too, must terminate by 1953 when Russia must give up all influence over the Chinese civil administration and allow the Chinese to request a ship of the Joint Sino-Soviet Military Commission responsible for military affairs.

The officials said that the 1945 treaty made Dairen a free port for Russian commerce whereas in the new agreement China has refused to agree to a free port.

(Contd. on Page 5, Col. 1)

Election Possibility

Broad Hint By Morrison

London, Feb. 27.—Saying that he was making no predictions, the Deputy Prime Minister, Mr. Herbert Morrison, told a Labour Party jubilee celebration here tonight that they would be "wise to be prepared for another General Election sooner rather than later."

Thanking Party workers for having put out the biggest aggregate vote in British history, Mr. Morrison said this of the prospects for Labour in the new Election. "Subject to our people being wise and sensible in their propaganda in the meantime, it is, I think, a fair assumption that the Tories (Conservatives) have pulled their maximum."

He said that the British electorate would have a chance to think again before the next Election when "I hope it will decide to return Labour with an adequate working majority and not recreate the extremely difficult situation which will now face all the Parliamentary parties."

Of the Liberal Party vote of more than 2,600,000 with only nine seats won, Mr. Morrison said that the Liberals, as far as he could see, "have not done much good" themselves or anybody else.

He added, "It may well be that Liberal intervention damaged Labour no less than the Tories."—Reuter.

BEVAN STAYS AWAY

Labour's Cabinet Left-wing leader, Mr. Aneurin Bevan, does not appear to have been among the crowd at No. 10 Downing Street, the Prime Minister's official residence.

The Cabinet's consultations have been confined mainly to the "Big Three"—Mr. Attlee, Mr. Herbert Morrison, the Deputy Prime Minister, and Mr. Ernest Bevan, the Foreign Secretary, together with Sir Stafford Cripps, Chancellor of the Exchequer, and Mr. William Whiteley, Government chief whip. Mr. Aneurin Bevan is not in the Inner Cabinet.

Meanwhile, Britain's immediate political future is still completely unpredictable. The Conservatives' leader, Mr. Winston Churchill, has summoned a meeting of his "Shadow Cabinet" tomorrow to discuss the situation arising from the "statelands" which members of the swearing-in which does not begin real business until after the Royal opening on March 6.

The Government's capacity to carry on indefinitely with its minute majority may hinge largely on the mood of its rank and file whom the leaders will meet behind closed doors on Wednesday to consider the Election aftermath.

FIRST DUTY

Observers think that the Government may well take the view that its first duty to its followers is to remain in office. Its task will be to satisfy the Party generally that this can be done without abandoning Socialist principles.

Much will depend upon the still unknown Election reactions of the Cabinet Left-wing leader, Mr. Bevan.

Conservative newspapers have been headlining him as "sukking" because the Cabinet did not take his advice for a November, 1949, Election. He did not attend Saturday's Cabinet meeting, but this is believed to have been because of intestinal trouble. No one can imagine the Health Minister staying away from any place where a show-down might be on the cards.—Reuter.

More Disturbances In Asmara

Asmara, Feb. 27.—Pistol shots wounded four Coptic Christians and two others were clubbed in minor clashes in a Moslem quarter of Asmara today. But other African sectors of the city were calm after the recent riots.

The total curfew, which was imposed four days ago, was not re-applied after this morning's free hours, though this was regarded as a tentative relief. Eritrean Moslems, Arabs and Yemenites were abandoning the Moslem quarter of the city for the European section, which has remained undisturbed throughout the week of rioting, and many goods warehouses were transferred.

In the African market areas Moslems and Coptic Christians Eritrean businessmen were making inventories of their property after last week's rioting.

Two Eritrean Copts will go on trial next week on charges of throwing hand grenades at a Moslem funeral procession near the Asmara Moslem Cemetery on Tuesday.

Captain J. C. Cooper, the Superintendent of the Asmara Divisional Headquarters of the Eritrean Police, told a British Court of Inquiry, which opened today, under Sir Frederick Peck, the Chief Secretary to the Administration, that the Moslem procession on Tuesday was "orderly and non-provocative."

He said he was fired on while carrying out police duties after the bomb-throwing and had fired back, killing two people.

EDITORIAL

No Meeting Of Minds

ONE subject which Mr. Churchill endeavoured to make an issue during the recent election campaign was a new approach to Stalin to reach agreement between Soviet Russia and the Western powers over the control and outlawing of atomic weapons. The people of Britain displayed only polite interest in the proposition, but in the United States, a similar proposition by leading scientists and politicians produced a quick reaction from President Truman and the Secretary of State, Mr. Acheson. Mr. Acheson developed the theme that it was useless discussing new agreements with Russia until the Western powers had sufficiently consolidated their alliance to make the Soviet appreciate future agreements had to be based on the reality that the West was capable of seeing they were faithfully observed by the Russians. Both President Truman and Mr. Acheson emphasised that an agreement would be worthless unless the independent strength of the democracies was the ruling consideration. The declaration points up one of the most basic differences in political and moral philosophy between the Soviet Union and the Western democracies. It is one of the irreconcilables that make our present international course so difficult. It is not a new thing, nor is it a product of the atomic age. It is a very old division on the question of what makes pacts valid. The difference in judgment was expressed several centuries ago in the controversy between Grotius and Bynkershoek. The Western democracies have followed the Grotius position, while the Soviet Union, like Bismarck's Germany, Hitler and

Imperial Japan, have followed the opposite doctrine. The democracies hold that an international agreement derives its validity from a meeting of minds. Because there is such an agreement the parties are bound to honour and respect it until there is a subsequent meeting of minds invalidating the first. Having agreed to agree, it is imperative to remain in agreement until it is agreed to disagree. The meeting of minds is a compact, contractual in character. It cannot be invalidated by the will or act of one party. But only by both. The Soviet position, on the other hand, is that treaties derive their validity from the advantage that accrues to the contracting parties. When that advantage ceases to exist in the case of either party the agreement is held to have fallen of its own weight and to be invalid and inoperative. Only such a concept could explain the extreme cynicism of the shotgun wedding between Nazi Germany and Stalinist Russia. That same concept explained the bland Japanese contention that the Nine-Power Pacific Treaty was no longer operative or binding because "conditions had changed." President Truman and Mr. Acheson are not indulging in a verbal sparring match with the Soviet Union. They are down to bedrock on American, and incidentally British, policy, on international law and on moral and political philosophy. The democracies cannot confidently suggest or promote an "agreement" at this point when they know that there is no meeting of minds on what shall make that "agreement" good.

Encourage Your Child To Create

By G. C. MYERS, Ph.D.

DON'T hamper the child when he is competing creatively with words, and don't hamper him with caution about spelling, punctuation and the like but to urge him "to get it down." Spelling and punctuation are, of course, important, but not at the moment of creation. I have advised teachers in evaluating a written "composition" even in the upper grades, high school and college, to measure or grade the composition first for its creative merit, then to measure it against mechanical standards. Most of us, also, only the spelling, punctuation and grammar are noticed while the real literary merit is ignored.

You can see why I so frequently urge parents to record the young of today from two to six. In doing so they gain a growing appreciation of his creations. They also encourage the youngster to go on creating.

Create With Words
I wish parents and teachers would continue to encourage the child to create with words after he has learned school, by taking down his oral creations or urge him as soon as he can write to put down his own words as they come to him any way he can get them down. But even the mechanics of his writing his own words hamper him, and some of his best ideas and expressions slip away before he can get them down. Fortunate the parent or teacher who can write in shorthand or has a machine for making recordings.

Some wise teachers induce individual children in the early grades to make up stories which these teachers take down. The child later reads the stories. What better way of teaching the art of reading? Besides, the teacher also can help the child gradually learn thereby the simple steps in punctuation, capitalization and other rules of mechanics by pointing out these matters at another time, which she observed in recording his oral creations.

Final Copy
See what possibilities the young mother has at home to make reading attractive to the beginner. If she does not have a typewriter for making the final copy for the child to read she should print it neatly and boldly.

"Helping Children To Create," Lois Lenski, in the November issue of "Childhood Education," is a writer and illustrator of outstanding children's books. That whole volume is devoted to developing language arts in young children.

To quote from that article: "Creative expression can start long before the technique of writing are mastered. It should always be remembered that creation is a flow of ideas. Given a stimulus, ideas come pouring from the mind like water from a fountain. It is all too easy to stop this creative flow. Interruptions will stop it. Rules for punctuation, spelling, grammar, handwriting will stop it. Rules and technical matters should be discussed and taught at some other time, not during the period of creating."

WOMANSENSE

Kimonos Give Way To Skirts In Japan

TOKYO. LONG skirts with gilded buttons and glistening accessories are taking the place of elegant kimonos, once the symbol of the submissive Japanese women, in most of the large cities and towns in Japan today.

On the Ginza, the Oxford Street of Tokyo, one store in every five declares its windows with colourful dress materials, plastic handbags and belts, American-style shoes and other items that fascinate the feminine eye.

Even nylon stockings, supposed not yet to be available in Japan, are nothing unusual to the well-dressed woman these days.

This general postwar conversion from traditional to Western-style dress may be attributed to two main reasons:

1. The comparative cheapness of the Western dress—although today, four years after the end of the war, food, and not clothing, is still the largest item in a Japanese family's budget. Even so, the average office girl may well have to spend two months' salary to make a fairly good quality suit. But it will cost her a fortune to get together a

UTILITY VERSUS TRADITION?

whole set of kimono, including rash, together with all kinds of accompanying strings and foot-wear.

The fact is, too, that of what-ever kimono or obi (decorative belts) a city girl may have managed to save from destruction by bombing, most have been bartered for food or turned over to second-hand stores to help to meet the high cost of living.

In spite of all difficulties, however, Japanese girls are not behind the girls of other countries in trying to keep up with world fashions.

But unlike Western countries, there is not one single woman or

group of women in Japan who sets the fashion. There are quite a few well-known designers, or rather owners of dress-making institutions in Tokyo, who are reported to be graduates of fashion schools in America, but they are by no means the Schiaparelli's of Japan.

AMERICAN fashion-books or women's magazines set the fashion in Japan. Every occupation girl becomes a living model for Japanese girls. Never before have they worn such bright and daring colours.

As it was not the custom in pre-war Japan for women to attend parties at night or go to horse-races, they displayed their gorgeous kimonos at theatres, concerts and weddings. In those days, the geisha girls were the one faction which set the fashion at Kabuki theatres.

Recently, exclusive dance parties have added new opportunities to a special class to show off their up-to-date clothes. But even today these occasions happen seldom to the ordinary woman. Here, too, as well as at wedding parties, long skirts and slim-back pumps are much more popular than colourful kimonos.

NEVERTHELESS, in spite of all their inconvenience and unavailability for present-day conditions, kimonos have not been entirely forgotten by young Japanese girls. They still wish to dress themselves in these beautiful garments on special occasions like New Year's Day or at festival time.

Even in the Americanized Japan of today, kimonos are indispensable to the housewife of a girl from a well-to-do family, and marriageable daughters still cherish a dream of having their chest of drawers filled with as many sets as possible of kimonos for all seasons—although they may never in a whole lifetime wear some of them.

Robin Simpson, an organist and pianist.

Mr Simpson was posted to India in 1945. Jean was demobilised a year later, worked for a time in Germany with the Malcolm Club, and then joined her husband in India.

Later they both worked on the radio at Penang. Jean has a good soprano voice. Ill-health forced her to return to England a few months ago. Mr Simpson has now joined her and plans to study for his doctorate of music while she is in America visiting her sick mother.

(London Express Service)

HERE AND there, we notice the peplum, that very good device for lending interest to an otherwise simple or slim silhouette. It is used to relieve the straight line of this charming afternoon dress which is fashioned of honey brown crepe. Cut out embroidery joins the skirt in front, with the peplum, handing clear in back. Embroidery is used on the cowl-draped scarf at the yoke line of the bodice which has short sleeves cut in one.

Have a Well-Planned Kitchen

By ELEANOR ROSS

WE hope that during the year you will be fortunate enough to have a new kitchen or a well-renovated one if you have been putting up for too long with an outmoded kitchen and poor equipment. But if such is not the case and you must perform carry on as for the time being, how about doing a little reorganizing on your own?

A definite place for each utensil not only saves steps but also makes it easier to keep cupboards and shelves orderly and neat. And if pots and pans are kept gleaming, those most frequently employed can be hung on hooks in plain sight, if desired. They give a bright, glowing look to the kitchen that is most inviting.

Efficiency
Efficient kitchens are primarily planned around three main work centres, and utensils should be located within easy

Give Lips Good Beauty Care

Neat application of lipstick is important if you want to look your best. For easy use, carry it in this case which has a mirror in the lid.

By HELEN FOLLETT

ALONG with her other good looks, a woman must keep her lips young and beautiful. And that is not the whole story either. She must arrange her lips in pleasing expressions. The ruby pigment gives accent to expression. If a girl is going to be pouty or surly, draw down the lip ends, she had better soft pedal on the lipstick.

One's characteristics are stamped on the mouth—patience, petulance, kindness, cruelty, selfishness. You have but to look and you can read. The cheerful, kindly woman is likely to have a better looking mouth than the woman who is self-willed and fault finding.

The extent to which mouth contours can change in the course of years, the certainty with which this feature is moulded according to the disposition, is really startling. Lines are traced by the habits of thought and feeling.

So much for that part of the subject. Now for the cosmetic needs. The fibres surrounding the

lips, that provide them with the power of movement, are small and delicate. A certain amount of attention during that beautiful half hour at bedtime will be of wonderful benefit. With creamy fingers placed under the lower lip, sweep outward to the ends, then bring them together in the centre of the upper lip. And during the daytime, pay special attention to the way you apply lipstick.

Here is another massage movement that will tend to keep the flesh firm. Place the left thumb and forefinger on the upper lip, the right thumb and forefinger on the lower lip; circle from the inside out, gently lifting the lips as you circle toward the centre of the mouth.

A favourite movement of facial operators is called fluting. The lips are gently and quickly lifted, first with one finger and then with the other.

Five minutes of these treatments and the lips will be of high colouring, the surfaces will be soft and smooth.

Let's Eat

BY IDA BAILEY ALLEN

Include White Bread in Meals

"I CANNOT understand why some people should decide to eat only a little bread, Madame. As you know, in Europe we are great bread eaters. In France bread is considered such an important food that it is strictly regulated by the government, both as to quality and price."

"In America we do not have such supervision. But nearly half the states have passed laws calling for the enrichment of all flour used in bread, which means that every loaf contains added vitamins and minerals beneficial to health. It would also add interest and variety to the menu if they would buy different kinds of bread, such as whole wheat, dark rye or pumper-nickel, which are made of natural grains and need no enrichment. Or raisin or cracked wheat bread can be used occasionally."

"Madame, in my opinion, the American white loaf is too soft and spongy. Sometimes it lacks flavour."

"Well, Chef, it's the kind of loaf that most homemakers seem to favour, and bread-bakers must cater to this demand. But it would be a good thing if they would cater to another expressed desire of consumers, as brought out in a recent survey, when 62.5% preferred bread with a home-baked taste."

"Which means better flavour and texture," remarked the Chef. "Now Madame, what is this fact that in order to reduce you must stop eating bread? To me that does not make sense."

In Normal Diet

"As a dietitian, I agree with you. To merely stop eating bread alone will not bring about a satisfactory weight reduction. A certain amount of bread is desirable in all normal diets, because through its starch content, bread helps to burn up or oxidize other foods. There must be a sharp reduction in eating cereals, fats, starches, vegetables, fat meats, rich sauces, cream and sweets. Even in a reducing diet, two slices of bread are needed a day. Whole grain bread is a better choice than white, because it contains a little less starch, more protein and is a helpful roughage food."

"I think a good idea for the extra use of white bread is like we do in France. We make big croutons cut a half inch thick, which we toast crisp in the oven. We put these in soup plates, and we pour over the soup—the onion soup, the vege-

Dinner

Tomato Soup • Crisp Rolls
Fish Fillets Florentine
Duchesse Potato Buttered Beets
Lettuce Salad
French Toast with Syrup
Coffee or Tea Milk (Children)

All Measurements Are Level

Recipes Serve Four

Fish Fillets Florentine

In the bottom of a shallow, well-oiled baking dish or low casserole, spread a 1/2" layer of chopped spinach. On this place 1 lb. fish fillets, cut in 4 sections. Pour over 2 tsp. milk; dust the fish with salt and pepper. Then cover with 1/2 c. grated Swiss or sharp American cheese. (Omit if desired.) Dot with 2 tsp. butter or margarine. Bake 35 min. in a moderate oven, 350° F., or until the cheese is slightly browned and the fish begins to flake.

Duchesse Potato

Prepare 3 c. well-whipped hot mashed potato, no lumps! Whip in 2 egg yolks, beaten with 2 tsp. melted butter or margarine. Then beat in 1/4 c. hot milk or just enough to make the potato of the right consistency to go easily through a pastry tube. Use to pipe a design around the edge of the fish fillets, with rosettes at the sides and ends. Or make separate large rosettes on an oiled cookie sheet, and bake in a hot oven until golden brown. Or heap the Duchesse potato lightly in a baking dish, decorate the top with swirls and rosettes and bake 20 min. or until golden, in a hot oven, 400° F.

French Toast

Beat 2 eggs; add 1/4 tsp. salt, 1 tsp. sugar, 1/2 tsp. vanilla and 1 c. milk. Cut 8 slices white bread in halves. Dip one piece at a time quickly in and out of the egg mixture. Fry in butter or margarine until golden brown, first on one side then the other. Serve very hot with heated syrup or molasses-butter topping.

Trick Of The Chef

For a Spring touch, add 1 tsp. finely-chopped tender green tops of onions to each plate of tomato soup.

BBC REVEALS FACTS THE SOVIETS DO NOT LIKE

POCKET CARTOON
—from America
by OSBERT LANCASTER

A respect for facts as opposed to dogma is the potent force behind the BBC's daily news broadcasts to Eastern Europe which the Soviet Union is trying so desperately to jam. Tangye Lean, the Corporation's European Services Controller, admits that there are more ingenious and forceful broadcasts. By Western standards, they are innocuous and sometimes flat. But they provide the acid test by which a doctrine stands or falls. And the proof of their attraction lies in the violence of the Russian reaction.

The Russian Service of the BBC was introduced into the schedule on March 24, 1946, writes Mr Lean in an analysis of the programmes in the latest issue of the BBC Quarterly.

"The innovation," he says, "was known to be unpopular with the Soviet Government, but for some time as good a face as possible was put on it. There was no formal ban on listening, and when members of the Supreme Soviet visited London early in 1947 they went so far as to attend a transmission in the

studio, and showed an amusing interest in announcers whose voices they had not known from wireless sets in Moscow.

"There are some 5½ million sets in the Soviet Union of which the majority have short waves. Letters posted direct to the BBC from Russia and other evidence suggested that there was a considerable audience.

"Then three years after the introduction of the Service, a jamming system abruptly came into action which cut off the German wartime campaign in extent and intensity. The task was not only to cover a constant many times greater than Hitler's widest area of control; it was hoped—no doubt with the help of the jamming network built up in the war—to achieve something more radical than a noise which would irritate listeners into switching off.

"The message from abroad was to be blotted out of existence. Some hundreds of transmitters were put into operation under central control points. The effect on the Moscow listener as he tuned in was like that of entering a boiler works or the engine room of a liner—and the same effect was reproduced in the extreme east.

THE FOLLOWING

The BBC does not know in detail the scale of following which these commentators have on the Soviet Union. But probably their colleagues who speak to Central Europe have a more devoted and equally numerous audience. "We know," says Mr Lean, "that Sir Robert Bruce Lockhart can count little short of one million listeners for his weekly talks to Czechoslovakia, and if Andrew Martin has fewer in Hungary it is probably because there are fewer sets.

"These speakers to the western satellites have a different emphasis in their scripts; they count with absolute confidence on the friendship of the listener and belong to the classical tradition of wartime broadcasters who helped to sustain the morale of occupied Europe. Below the surface in central Europe, nationalised around gloves strongly. Bruce Lockhart's particular advantage is no doubt his former friendship with Benes and Jan Masaryk and his association with the first Czech Republic. But he appears to be particularly well attuned to the emotional attitude of the Czechs and the quality of their resentment against their Soviet masters.

"In these Communist-dominated States there is of course a far less need than in the west to probe a facade of dominant theory. As yet Communism is not a dogma instilled from above in childhood but an attitude, with an alien face. The struggle is to keep an existing faith alive rather than to challenge assumptions held by authority to be right.

TEXTUAL DISPUTES

"Nevertheless, occasions even for textual dispute have presented themselves, most notably in the trials of Mindszenty and Rajk. Somewhat rashly the Hungarian radio broadcast live extracts from these proceedings without taking adequate precautions for a fluent, during unforeseen episodes. BBC correspondents, made at the time from transmission, were available to compare with the official Black Book claiming to have the evidence of Mindszenty in full and with the official Blue Book which did the same for Rajk. In both there were small but crucial falsifications of the evidence of the accused.

"Horrible enough in themselves, with the dull brooding quality of a witch trial, the records formed the substance of devastating broadcasts when they were later played back in completion of the printed story. 'Can you follow the trial?' demands the judge in the Black Book, and in those pages Mindszenty simply answers, 'I can'. But from the record his voice rises like a ghost, pleading pitifully. 'I am exhausted, physically and mentally, that is certain.'

"New to its task, unaware of BBC recording facilities, the Hungarian ministry of Truth over-reached itself in these excursions.

MANY FREQUENCIES

"The BBC replied with an outbursting movement of the kind which was successful in Europe under the German occupation. Transmissions were rearranged to allow a maximum number of frequencies to carry the same broadcast simultaneously. This produced between twenty and thirty transmitters operating in half a dozen wavebands simultaneously, an array of short-wave transmitters equal to anything that was mounted in the war.

"But as the arrangement was carried out in co-ordination with the 'Voice of America' and their broadcasts now coincided with those of the BBC, the total array was extended by as many transmitters again. On October 25, 1949, the Postmaster-General could reassure a member in the House of Commons that adequate reception should be obtained at nearly all times in most parts of the British Isles on one or more wavelengths.

"But what are we to make of the violence of the Russian reaction? To mount the jamming campaign must have taken time, perhaps a substantial part of the three years which passed since the BBC began its broadcasts. Had we in the interval outdone the propagandist's reputation for deceit, so that jamming was necessary, as Mr Voznesensky has explained, to stamp out the BBC's broadcasts on a false note?

"The answer is that we had confused ourselves to the truth and that jamming plays the same role in the ether as the veto in the Security Council, or a travel-ban on the exchange of international visits.

DAILY BULLETINS

"Three bulletins a day are broadcast to Russia as well as to Rumania, Bulgaria and Hungary. Germany has eight, Czechoslovakia and Poland have four, Albania two and Finland one.

"Observer", the chief commentator on the Russian Service, achieves, considers Mr Lean, an admirable balance of sanity and humour in his comments: a speaks sympathetically, a backs bravely, as one might expect opening the eyes of a friend to the fact that his wife was deceiving him. His quiet self-assurance contrasts sharply with the tone of Moscow's replies to the BBC. For, inhibited by our own reluctance to indulge in a war of words, Moscow delights in assaulting particular broadcasts, and it does so in terms out of relation to the cause of offence.

"Then there is David Graham, 'distinguished by his knowledge of the texts of Communist theory and by a more aggressive attack than Observer's.' He has

NEWS IN PICTURES

WIND AND SKILL—The sailor of this felucca has set his sail high above the Nile River, near Cairo, Egypt. These picturesque little boats have been engaged in transportation work for the Egyptians for centuries, and are still popular.

HE'S THEIR CHOICE—When actor Farley Granger was visiting New York between Hollywood pictures, 500 fashion models voted him their choice as the year's most eligible bachelor. Here he poses with some of his admirers.

SHE NEEDS A FRESH START—Movie actress Betty Hutton, vacationing in Sun Valley, Idaho, discovers that you can't go in two directions at once when you're on skis. She had less trouble when she learned that skis work better if pointed in the same direction.

DETOUR—An empty coal truck points its nose skyward while another truck is partially suspended from the wreckage of a 100-foot bridge in Little Falls, New Jersey. No one was injured when the 50-year-old span collapsed under the combined weight of the vehicles, but five men involved were treated for shock.

FOR WARMING THINGS UP—This machine was produced by a firm in Chicago for the purpose of keeping buses warm at night. It passes its steam to four auxiliary machines which, in turn, pump the steam into each of five buses via a set of rubber hose. This technician is fastening a hose to the engine of a bus.

RECLAIM SWAMPS—Watching hip-booted workmen begin work on France's swamp clearance programme in Normandy are, left to right: Barry Bingham, ECA Mission Chief to France; Yves Thuot, Under-Secretary of State for Agriculture; Francois Filchy, French engineer in charge of the swamp reclamation, and Etienne Hirsch. The project, financed in large part by Marshall Plan funds, will reclaim 5,000 acres of farm land.

BIG BUSINESS IN CORSETS

IN January and June each year, New York puts on a show called National Corset Market Week. The deadly serious audience of 2,000 is 100 percent female, all clutching notebooks. They are showing the current "line" and, after much buzzing on styles, prices, and manufacturers, are guided into ornate cubicles to place their orders for America's department stores.

The industry wishes the word "corset" would get lost. Even "foundation garment" doesn't completely satisfy them. They keep hoping some nimble brain will come up with a label that will cover their business as snugly as an all-in-one houses the female torso.

AK, ZYZZ, ORANGES & LEMONS

Some Americans with funny names are among the 3,600 who are writing to the United States Census Bureau every week, to straighten it up on their family trees.

They are trying to help the Bureau prepare for this year's 10-yearly population census.

Already the Bureau has heard from Mr. Ak, Mr. Puh, and Mr. Hiedonmuckly S. P. Lahn.

Mr. Zyzz has also written in. So has Mr. Junior Senior, Jr., who said: "My father, Junior Senior, Sr., has the same name as mine, but isn't related."

One of the main subjects of correspondence is changes in family status.

A man called Orange Grove told the Government he had had two children—Lemon Grove and Bill Pickle.

Likewise, Miss Hoggar had reported her marriage to Ben Skins.

Mamie Mouse complained that the Census Bureau had turned her daughter into a cat, and asked if that would make any difference?

Bootlegging In Cigarettes

Bootlegging is back in the United States—not liquor this time, but cigarettes.

In an ever-widening search for new income, 38 of the 48 American States have put heavy sales taxes on cigarettes.

But eight of the other 10 do not tax them at all and a chain of operators is very busy indeed selling cut-rate smokes by post.

It has become such a big business that the 38 States estimate they are losing up to \$20,000,000 a year tax.

CRETAN BANDAGE

Four thousand years ago Cretan women bandaged from waist to hips to achieve the 20th B.C. version of the curve that compels Catherine de Medici, a contemporary of Queen Elizabeth, to wear a top far little brach of metal to reach that two halves, open at the double doors. The body is bent between the halves, an adjustment snapped them shut and covered the thirteen-inch waist line by seven lengths. This lot of figures would thirty or forty pounds.

Few corset-makers now produce a smaller waist than twenty-five inches. Forty years ago when corsets laced back and front, the average waist measured 19 inches.

About the only change that hasn't taken place in woman's body is the shoulders. They're the same as Cleopatra's. Miss or Mrs. America today is no straggler. She stands five foot three inches tall, weighs nine stone seven pounds, has a bust measurement of thirty-five and a half inches, a twenty-nine inch waist, and thirty-eight inch hips.

VOGUE SHOCKED

For the first time in 1914, a corset was advertised as actually being worn instead of as an empty hollow structure. A shocked Vogue refused to run the pen and ink drawing until everything "objectionable" was eliminated. The result was modest though confusing. Only the corset itself, a head and a hand hanging in space and two dangling slipped feet connected to nothing else were left.

The industry agrees that the biggest thing that has happened to it was the invention of elastic thread in 1930. This made possible a garment that would stretch not only back and forth but up and down. With the advent of nylon a whole corsetette can be crumpled into a handful.

K. O. CANNON The Riddle of the Red Domino

CRISIS LOOMS AS FRENCH STRIKES SPREAD ALARMINGLY

Paris, Feb. 27. — About 180,000 automotive and engineering workers in the Paris area walked out today, swelling the French strike movement which is now spreading rapidly through the provinces.

Strikes were reported in the textile, chemical and paper industries and in the building trades. Still more widespread walkouts already have been voted.

TIGHTENING UP DRIVE IN MALAYA

Singapore, Feb. 27.—Malaya today took the first step in the anti-bandit month campaign to stop food supplies from reaching the Communist terrorists.

All lorries carrying foodstuffs were stopped and checked. Drivers had to show proof of their destinations.

Patrols went along the East and West coasts to prevent illegal landings of food and other stores to the guerrillas. Enrolment of volunteers has risen to 364,000.

In virtually every city and town in the country, civilian volunteers are active. They have taken over routine duties from the police to free them to join the security forces in the jungle hunt for Communists.

The government hopes, but does not expect, that the campaign will give a knockout blow to the terrorism which has plagued Malaya for more than 10 months.

As it openly flaunting the anti-bandit month drive, terrorists murdered three Chinese, including two women. The two women were the wife and sister of a Chinese whom the Communists had kidnapped previously.—Associated Press.

Miracle Walk Under Ice

Oslo, Feb. 27.—A five-year-old boy, Borge Tjellestad, from Oesterviken, Southern Norway, fell through the ice on the Glomma River today but walked 100 yards under it and was rescued.

Left Froen, a small holder in the district, told The Associated Press tonight: The little boy was walking across the Glomma when suddenly he fell through and into the water. The boy, however, started walking on the bottom of the river and was partly carried by the slow moving current. People who came to his rescue tried to cut a hole in the ice, but in vain. Observing through the transparent ice that the boy was walking, they succeeded in directing him to a cut in the ice, where he was picked up, Left Froen said.—Associated Press.

SINO-SOVIET TREATY

(Continued from Page 1.)

that the Soviet has any rights there at all.

It was pointed out that both sides had agreed that the question of Dalen must be further considered upon the conclusion of the Japanese peace treaty and that meanwhile the administration and all property under Russian possession must be taken over by China this year.

The experts said the "new treaty in no way confirms renewed Russian rights, interests or positions in new China. It starts from the principle that the Russians are moving in with it in 1952. There is no evidence of secret protocols and it is believed that Moscow met its match in Mao Tse-tung."—United Press.

Leopard Still At Large

(Continued from Page 1.)

Foot trap and lots of caution to catch the big cat.

Damoo Dhorre, a native of India and veteran trainer for Ringling Brothers Barnum and Bailey Circus in his winter quarters in Florida, warned Oklahomans that the leopard is "meaner than the lion or tiger" and has the lust to kill.

He said, "The best way for them to capture the beast is to locate the area in which they suspect he is hiding. They bait a trap with a live goat and have a man hiding in a nearby tree to pull the trap door when the leopard goes for the goat."—United Press.

Qantas To Run To Tokyo

Melbourne, Feb. 27.—Qantas Empire Airways has been granted the right to carry civilian passengers between Sydney and Tokyo, its chairman, Mr. Hudson Fysh, announced today. The service would operate twice weekly, starting on March 3, he said.—Reuter.

"Form Filling" Wracs Take Course

Girls of the Women's Royal Army Corps are now undergoing a course of physical training to fit them for further duties in this field later on in their service careers. A special course is now in progress at Aldershot. This form helps the girls to find their form.

AT LEAST A YEAR TO BREATHE!

Scientist's Gloomy H-Bomb Analysis

New York, Feb. 27. — A leading American scientist said today that it will take about 12 months to develop the first experimental hydrogen bomb.

Dr. Hugh C. Wolfe, chairman of the Federation of American Scientists, said that even then "there is a fair chance that it will not work at all—that it will prove to be a dud."

The statements are made in an article in the magazine, "United Nations World," a private publication having no official connection with the U.N.

Dr. Wolfe says Russia would have "great advantage" in an H-bomb war for two reasons:

1. Russia industries are not crowded in big cities like American ports.

2. American people are accustomed to higher standard of living.

A breakdown of water supply and other facilities "would tend to paralyze the American people both materially and psychologically" while the Russian people could "live on roots and sleep in the forest."

On the other hand, the United States lead in technology gives it "comparative advantage" in the H-bomb manufacture and the development of carriers to deliver the dreadful weapon.

However, recalling the under-estimate of Russian ability on atom bomb development, Dr. Wolfe says: "We have no sound basis for predicting that we will be ahead of them in the development of the H-bomb."

The H-bomb "doesn't exist at present except as a theoretical calculation. It will take some 12 months to bring it to the stage of the first experimental A-bomb that was set off at Alamogordo in New Mexico on July 16, 1945."

The scientist expresses the hope that President Truman "will appoint a new commission to study atomic energy controls and suggest new American proposals for action to United Nations."—United Press.

Thousands More Thrown Out Of Work

Pittsburgh, Feb. 27.—New cuts in steel production put thousands more out of work today as the industrial effects of the big soft coal strike became more severe.

This is the third week of the nationwide walkout of 370,000 miners.

Even before today's cuts the miners' strike was estimated to have thrown 200,000 people out of work. The miners have ignored a Court order to return to work.

In Washington today, their union pleaded not guilty to charges of contempt of court by defying a Federal Court "no-strike" order and failing to get the miners back to the pits.

The union's attorney has contended that the miners were acting individually—that the union itself had nothing to do with the present strike.

The Court's decision has not yet been given.—Reuter.

A DELICATE QUESTION

Manila, Feb. 27.—President Elpidio Quirino told a press conference today that the Philippines will continue making specific trade arrangements with Japan through SCAP but is not willing to conclude a trade agreement with Japan herself pending the signing of a peace treaty.

There is a proposal by SCAP for us to prepare a trade agreement with Japan. My answer is that while we welcome a trade agreement and are actually trading with Japan, we would rather conclude a formal trade agreement after ascertaining the nature of the peace treaty.

When asked whether he would be willing to make a separate peace settlement with Japan, Mr. Quirino said: "I don't like to answer that question now. That is a delicate question."—United Press.

DR. STIKKER OPTIMISTIC

New York, Feb. 27.—Dr. Dirk Stikker, the Netherlands Foreign Minister and special representative of the Organization for European Economic Co-operation, arrived today by air from London for talks with President Truman and the Secretary of State, Mr. Dean Acheson.

He will discuss with them the policies and objectives of his new post.

Dr. Stikker was optimistic that progress could be made for the greater economic unity of Europe.—Reuter.

Athens, Feb. 27.—An explosion wrecked part of the Greek Army broadcasting station here today. The cause was not immediately known.—Reuter.

Action Against Bulgaria

Washington, Feb. 27.—The United States today "banned" American citizens from entering Bulgaria on private business. All new American passports will be stamped "Not valid for travel in Bulgaria."

Records indicate that 62 Americans are in Bulgaria in private capacities. They will not be forced to leave because of the ban. However, if any of these Americans leaves Bulgaria, he will not be allowed to return.—United Press.

Westerling Case Puzzles Singapore

Singapore, Feb. 27. — A responsible Singapore government official said today that there is "no question" of Captain "Turk" Westerling being extradited to Indonesia.

The United States of Indonesia government has formally asked the British authorities to return Westerling to Jakarta.

The former Dutch Army Captain recently led a band of guerrillas against the Indonesian government, capturing the important town of Bandong in an hour and a half.

Earlier another Singapore official had said that the government was studying extradition procedure in Westerling's case.

No decision has yet been reached, the first official said, whether Westerling will be charged in a police court or deported to Holland.

Westerling, who was arrested on Sunday, was charged with entering the colony without a permit. Unlike other prisoners in the Central police station, he is getting his meals brought in on trays instead of the normal prison food.—Associated Press.

DUTCH ATTITUDE
The Hague, Feb. 27.—Dutch legal experts said today that they believed it impossible for Singapore to hand over Captain Paul "Turk" Westerling to Indonesia.

Westerling would be expelled from Singapore, but it is expected that he will be transported to Holland because he is a Dutch citizen.

There is a big question whether Westerling can be brought before a Dutch military court, because he was demobilized when he began his insurgent activities in Indonesia.

Official quarters breathed a sigh of relief over Westerling's flight from Indonesia. They were worried over his stirring up unrest, for which the Dutch were being held to blame in many quarters.—United Press.

Radio Hongkong

H.K.T. "Hongkong Calling"—Programme Summary: 6.22, "It's Swing Time"; 6.20, "Cantonese by Radio"; 6.50, "London Promenade Orchestra" (Studio); 7.00, "World News and News Analysis" (London Relay); 7.15, "Letter from America" by Alistair Cooke (London Relay recorded); 7.30, "Jolson Sings Again" (Presented by Allen Woods, Studio); 8.00, "From the Editorials" (London Relay); 8.10, "Box 200" (Doris Gillespie, of the Hammond Organ); 8.30, "The Blue Danube"—The True Story of the Strauss Family and their Controversies (Studio); 9.00, "Forum of the Air"—Team: Phillipa Coombes, P. GRAVE WARNING ON INDIA'S COMMUNAL FEUD

Karachi, Feb. 27. — The Prime Minister, Liaquat Ali Khan, today warned India that Pakistan was "fully prepared for war" if India wanted to fight.

In a prepared statement which he read to a press conference, Mr. Khan blamed India for the recent communal rioting in the East Pakistan-Bengal area and said 221 persons were killed and 276 injured in East Pakistan alone.

He charged that the Indian Prime Minister, Jawaharlal Nehru, had "misrepresented" the situation in a recent report to the Indian Parliament, in which Mr. Nehru blamed East Pakistani Moslems for starting riots.

"As recently as February 23, addressing the Indian Parliament, he (Nehru) said at the end of a long peroration, which was full of inaccuracies and misrepresentations, that if the proposals that had been made to us by India were not agreed to by Pakistan, India 'would have to adopt other methods'."

"I invite all peace-loving people of the world to note this threat. 'As for ourselves, I repeat we want nothing but peace. I have said it before and say it again, we have no aggressive intentions toward India.'"

He continued: "Our policy is to live and let live. On the other hand, if India wants war, she will find us fully prepared. We value our freedom more than we value anything else in the world."

Mr. Ali Khan said the only solution to the problem was that "we should win the confidence of the minority communities on either side and convince them it is to their own governments they should look for redress for their wrongs and not the government across the border."—United Press.

Steel Embargo Lifted

London, Feb. 27.—Moscow Radio said today that an agreement had been signed for the lifting of West Germany's embargo on steel exports to the Soviet zone.

The Radio, which quoted a message from the official Soviet news agency Tass in Berlin, said that it was signed yesterday by Mr. Joseph Groppe, head of the East German Trade Department and Dr. Karl Kraumann, his West zone counterpart.

West Germany imposed the embargo on February 8 because the East zone had fallen behind with deliveries under the international trade pact.—Reuter.

"I think we ought to set aside at least one week to settle for once and for all the squabble between the Army and Navy."

THE CUP BATTLE IS MOVING UP TO ITS CLIMAX

BY PETER DITTON

The battle for the FA Cup is reaching its climax. Wolverhampton, the holders, Tottenham, the "team of the year" and Portsmouth, League Champions, have all fallen by the wayside. From an original entry of hundreds, only eight teams remain in the competition. Among them are my "Big Three", Arsenal, Derby County and Manchester United, whom I named in a previous article in December. It is interesting perhaps to note that the sixth round draw, in which they have avoided each other, gives all three a chance to reach the semi-final.

Somewhat, I still feel that this will be Arsenal's year. They are playing just the type of football that wins cup-titles, and what is even more important, they are having the little extra bit of luck which is so essential to every team that wins the Cup Final.

They have been drawn at home against Leeds United in the sixth round of the competition. It is the fourth time running that they have been thus fortunate. Furthermore, it is the third occasion on which they have drawn opponents from a lower division.

Britain Plans International Athletics

London, Feb. 27.—Because of the requirements for the European Athletics Championships, which are to be held in Brussels between August 23 and 27, neither Sweden nor Finland were able to accept an invitation to meet Britain in an international match at the White City on August 5 and 7.

Instead, the British Amateur Athletic Board will stage the England-Wales, Scotland and Ireland triangular match at the White City on August 7. This serves as an official trial for the European Championships and will form the basis of selection for Britain's team.

SELECT TEAM

Britain's team for Brussels will be selected immediately after the match. In view of the high standards of athletics in Europe, the British Board has decided to send as full a team as possible, but will send only athletes whose standards of performance merit inclusion in a team of this importance. Britain will enter a team for a small international match against the United States and a team representing the Benelux countries at the White City, London, on August 12.

The British Board is also sponsoring invitations to a number of leading athletes from Europe for special invitation events at the White City.

TURKEY AND GREECE

Britain had accepted in principle an invitation to send a team to Istanbul and Athens to take part in full scale meetings against Turkey and Greece respectively in September, 1951. This will be the first time that a fully representative team from Britain has met either Turkey or Greece in a full international. A team of 10 Turkish athletes will compete in invitation events at the White City, London, on August 12, 1950.

The British Board announced that 22 countries have so far signified their intention of competing in the European Championships in Brussels. Replies were being awaited from five including Russia, Poland and Bulgaria.—Reuter.

CHAMPION OBLIGES

Jeanette Altwegg, of England, shows one of the figures that won her the 47th International Ladies' Skating competition over 16 competitors at Davos, Switzerland.

NOT EVEN A HALF-BLUE FOR TABLE TENNIS

Oxford University Blues Committee has decided not to award half-Blues for table tennis. They give the following reasons: The game is not athletic enough; The college organisation and standard is not high enough; There is not enough competition because of the low standard; and Not enough people in the university play the game.

I read this news over the telephone to that high apostle of table tennis, Cort Woodcock, former chairman of the ETTA, and invited his comment on the "not athletic enough" reason. "I wish," said he, "that I could think of something sufficiently devastating, sufficiently quickly, but I can't."

CAMBRIDGE DIFFERS

There are about 350 table tennis players in the university at the moment and each club has its own table. The trials and the Singles Championship, now being played, both attracted good entries. For several terms Oxford University players have sought official recognition. Hopes were raised early this season when the Cambridge University Table Tennis Club received official permission to award half-Blues.

GIANT OF GOLF

Harry Weetman, Hartsbourne, one of the young golf giants—he is 14½ and an inch short of 6ft.—is to defend his title at the Assistant's Championship. This event, with its £500 prize money, opens the professional golf season and will be held at Worsley, Lancs, April 4-6. Harry, one of the longest hitters, is playing so confidently that his friends expect he will figure prominently in the major tournaments this year. Many of the younger players in the South will be seen at the

WHERE NO SOCCER IS

Support for my plea for a new first-class soccer club for that neglected area North-West London comes from Mr M. W. Armstrong, of Hildon Road, Harefield, who writes:

"Being a regular at Chelsea from here means an inward journey of at least 50 minutes and a homeward journey of anything over 1½ hours. Arsenal from here in my view is an even more prohibitive journey."

Wembley Stadium, I feel, ideal as it would be, could not be the answer as I am sure with the various big events there, it could not be available to any club regularly throughout the season. What about the Northolt Racecourse, complete with stands, which is just standing idle because some one might want it in the year 'dot' for house building?

"Otherwise, surely some of the city means, where their enterprise by setting up a first-class club and ground where they know an enormous regular attendance could be assured?" The enterprise is full of difficulties, not the least of which is obtaining admission to Division II, and then to Division II and Division I. It is a chance for men with a lot of money and a lot of faith.

TO COACH AMERICANS

There are two women's hockey teams and lacrosse—at which we beat the Americans easily. We may beat them less easily soon, to judge from American keenness.

Two of our leading players, one from each game, are to spend their summer holidays this year at Merstead, an American holiday camp, and will do some coaching there. One of them, Miss Margaret Lloyd, captained the England hockey team last year and is a mistress at Wycombe Abbey School. The other, Barbara West, plays hockey for the South of England.

ARCHERY BY POST

Postal archery is frequent, but postal archery must be a novelty Mr Frank Bilson, vice-president of the Grand National Archery Society, and champion archer 1948, tells me that such a competition has now been set between countries of the Empire as an adjunct to the Empire Games. Each nation has shot at home and the results are compared by post.

Distances vary from 30 to 80 yards, and some of them involve shooting out of doors, which may give the countries now in summer an advantage. There will be a prize for the best team of four of any club and one for the best individual.

COLD WAR!

North London answers South among the winter swimmers. Recently Mr Frank Davis, of Brockwell Park S.C., asked whether any club could match the cold-water immersions if his own—a score daily, often 50 on

Sundays: 43 on Christmas morning.

Today Mr A. C. Bewick enters the lists on behalf of the Highgate Lifebuoys, 47 years old, who meet every Sunday at Highgate Pond. He writes: "Mr Davis sounds like a small boy with a new toy. Fewer than 30 members at Highgate is something no one can recall, and one Christmas morning race had 60 starters. Winter swimming has been going on for 47 years, but we do not boast of this."

"On the morning Mr Davis says they had 17 members swimming at 34 degrees, we had 37 at just one degree colder!"

RACER AT 71

There follows a more concrete counter-challenge from Lifebuoys, extended to Brockwell Park "for anyone else": "Ohr president, Tommy Robertson, will race anyone his age, Tommy swims at the year round at Highgate Pond; only he does this at 7.0 a.m. He does not like a crowd, at least not more than a dozen, or so. Tommy is just 71 and a bit. "We can also put out a 4 x 50 yards team of veterans with Tommy, Charles Cox, 66, Pop Reynolds 65 and Scotty, who just scrapes in at 61. They will also race any team over 60 in any temperature."

"Nor are we a club for old crocodiles. The London county champion, Stan Hawkins, is one of our members."

Now then, Brockwell.

—(London Express Service)

Ray Fitton Draws With Romero

Manchester, Feb. 27.—Luis Romero, Spanish holder of the European Bantamweight Boxing Championship, was held to a draw by Ray Fitton, of Manchester, in a 10-round non-title bout here tonight.

Romero had previously beaten Fitton on points in Llanesona. The Englishman, who was several inches taller and had a big reach advantage, was the less sturdy and did not look like having a chance against the tough little Spaniard in the first few rounds.

But as the contest wore on he found the answer to Romero's bull-like rushes—a right uppercut to the face which he used with telling effect in the seventh and eighth rounds. The verdict was well received, but came as a surprise to a large section of the crowd who thought that Romero's aggression and earned him the decision.—Reuter.

SIAMESE LOSES

Sydney, Feb. 27.—Australian Bantamweight Champion Elley Bennett, 117½ pounds, stopped Siamese flyweight Chai Sitphol, 115½ pounds, in four rounds at Sydney Stadium tonight. The fight was scheduled for 12 rounds.

Sitphol opened strongly, but weakened half way through the second round. After taking severe punishment in the next two rounds, he decided to retire.—Associated Press.

Commonwealth Cricketers Win Test From Ceylon

Colombo, Feb. 27.—The Commonwealth cricketers won the unofficial Test against Ceylon here today by an innings and 51 runs with 35 minutes to spare. Ceylon had followed on 202 runs behind yesterday and they found the wicket almost unplayable today owing to a little rain which had fallen last night and which caused the start to be delayed an hour.

When play was resumed, every ball kicked up and made a small mark on the pitch, causing batsmen to do a good deal of patting down. Pope and Freer found the wicket to their liking and in one spell after lunch Freer took three wickets for one run in four overs and his next five overs cost only eight runs.

Sathasivam, who gave a classic display yesterday, looked set for another good performance until a ball from Freer kicked up and hit him on the wrist while Pope, fielding in the leg trap, made no mistake in taking the catch.

PLUCKY STAND

Earlier Sathasivam hit Freer to two successive fours. Rodrigo and Coomaraswamy played

pluckily for more than an hour and at one time looked like saving the game. When Rodrigo stepped out to drive a ball which beat him and struck Livingston on the chest. The wicketkeeper just failed to gather it and make a third stumping success.

The innings should have ended in the same over when Rodrigo stepped out to drive a ball which beat him and struck Livingston on the chest. The wicketkeeper just failed to gather it and make a third stumping success. The innings should have ended in the same over when Rodrigo stepped out to drive a ball which beat him and struck Livingston on the chest. The wicketkeeper just failed to gather it and make a third stumping success.

AUSTRALIAN TOUR

Maritzburg, Feb. 27.—Natal drew with the Australians here today when the return match between the two sides fizzled out mainly because of the rain, play decision owing to rain on Saturday.

It was, therefore, confined to two days, and Australia, who had scored 312 runs on Friday, today dismissed Natal for 145 runs. The follow-on was enforced and Australia, battling against a rain-soaked pitch, engaged on 100 for the loss of one wicket before stumps were drawn.

When play resumed today Natal had two wickets down for 34 runs, having lost those late on Friday with only four runs on the board. Saturday's play was washed out and so Dawson and Nourse endeavoured to rally the Province this morning on a pitch which always promised to be difficult.

Overnight rain had seeped under the covers but it dried out before another wicket fell. Then Nourse was caught by Harsett off Bill Johnston for 24, which had taken him nearly an hour and three-quarters. Dawson, who had been an uncertain start, started well and had passed his half century by the lunch interval when Natal were 111 for four, McLean having fallen to Walker.

At 110 the new ball was taken and Miller immediately met with success. He took three quick wickets for only four runs and captured a fourth before Ian Johnson tempted two later batsmen to put up catches, and the side was out for 145.

Dawson, one of Miller's victims, hit 59 in 213 minutes, finding the boundary five-times. When Australia batted again Moroney fell at 34, but London joined Archer before tea and continued an unbroken stand of 72 afterwards. Archer, in the 102 minutes which the innings lasted, scored 50 not out, including five boundaries.—Reuter.

COLONY TENNIS Easy Win For Edwin Tsai

Edwin Tsai stroked his way closer to the Colony Singles Championships with a convincing 6-1, 6-2 win over Lee Wai-long in their singles fixture at Chater Road yesterday.

This was the feature game but spectators who flocked to watch them missed a little drama being enacted on another court. This was a game between C.Y. Wong and Ho Kailau, crony old veteran of more than 20 years of tournament play.

Ho's cleverness—his delightful lob-shots—against a vigorous opponent was a delight to watch. He was the old batter pitting his tennis brains against a younger man, and Wong beat him only 7-5 in the first set. He called on all he had in the next set, and won 6-3 but that was all. He could not continue for the deciding set, and Wong stepped up to the tournament ladder. Ho, left behind, was a Doubles runner-up in 1939, 1935 and 1930.

HIGHLIGHT MATCH

Meanwhile, in the highlight match left-hander Tsai didn't take long to show his superiority. He stroked powerfully, made Lee run, and dancing at the net, chopped off returns by smashing lobbs or slashing their crosses.

Lee's backhand often let him down and after some hard-punched rallies he was generally caught out of position. He had little overhead power, but brought off some brilliant saves. There were six deuces in the fifth game.

Lee won the second game of the first set, and the first and fifth of the second. Tsai was too clever and nippy for the former Soccer idol. Other results: Tsai Wai-pui beat B. Fong, 6-1, 6-2; Henry Lee had walk-over over S.K. Wong, 3-6, 6-2, 6-1; Roch Liang beat Y. Kwok 6-2, 6-1; Eddie Chan beat A. Patrick, 6-2, 6-2, 6-2. H.A. Ayres beat Wong Shek-mun, 6-2, 6-1.

Today's games are: In Koon-hung v. J. Doyle, 3-1; S.K. Wong v. George Choi; H.A. Ayres v. C.Y. Wong; Eddie Chan v. Edwin Tsai; Tsai Wai-pui v. Chey Tin-wah; Au Kam-mook v. Col. Saxon.

HKDF WINS HOCKEY FINAL

The climax to the Army Inter-Unit hockey final—after two re-plays—came yesterday, when Hongkong Defence Force, beat 14th RA, 2-0.

Although play was not quite up to the standard of the previous games, it was, nevertheless, a close tussle. The first half, which produced no score, saw little positional play. Both teams seemed over-eager to force a decision, and the Gunners, in particular, made many mistakes.

EARLY LEAD

HKDF took the lead early in the second half, when from a pass by Fowler Hull sent a hard shot, which was well saved by Hill. The ball however rebounded from his pads and Gerry Gosano drove it through a mass of players to find the net.

The gunners pressed hard, and Pitches gave a clever exhibition of ball control but the forward forwards did not give him enough support. Play then swung to the RA goal area, where Fowler gained possession, only to have his stick hooked when about to shoot. From the resultant penalty bully, Gosano dribbled the ball clear of his opponent to net their second goal.

TEAMS

HKDF: Clark, New, Gon-salves; Osmond, G. Gosano, Pugh; Slater, Marques, Fowler, Rull, Guterres.

14th RA: Hill, Leddington, Mclelland, Butler, Dudley, Brown; Rector, Hayde, Mann, Pitcher, Walker.

At the completion of the game, a shield—the first of its kind for this competition—was presented to the winning team by Mrs Pugh—wife of Major Pugh—together with medals for both winners and runners-up.

It is understood the winners will embark in the troopship Devonshire for Singapore, where they will meet other Army unit teams.

Record Jump In Varsity Heats

Miss I. Renner broke the University ladies long jump record with a leap of 13 feet 11½ inches during sports heats at the University yesterday. The previous record jump was 13 feet 6½ inches.

The promising girl jumper, beat other competitors, and will compete in the finals on Saturday.

Other results of yesterday's sports programme were: Final 220-yard low hurdles—S. K. Cheung (30.2 sec), 1st; Wong Tze-chung, 2nd; Lok Yee-hee, 3rd. 8. Ladies' shot putt—C. Braga, 1. E. Smart, 2. M. King, 3. E. King, 4. Ladies' long jump—Miss Renner, 1. E. Smart, 2. M. King, 3. E. King, 4. 440-yards—N. Lo, 1. J. Chan, 2. P. Young, 3. G. Wagner, 4. Chan Leung-guan, 5. A. Low, 6.

	♠ None	♥ KQ7632	♦ AK543
	♠ AK543	♥ A	

Tournament—N-S vul.
South West North East
1 ♠ Pass 2 ♠ Double
3 ♠ Pass 4 ♠ Double
Opening—♦ 9 28

with the king and he is automatically down. When South leads a heart East is going to win with the ace and if he returns a diamond West will ruff it.

But do you know that not one of the East players returned a diamond? They all decided to lay down the king of spades first, then they were going to return a diamond. Of course the king of spades was trumped and the balance of the tricks were claimed by declarer.

If you just stop to think what is South bidding six hearts on? He is off the ace of trump and also a spade trick. It may be hard for you, sitting in the East position, to figure West with a seven-card spade suit and not overcall. But should it be harder for you to put a spade in the South hand and have him bid six hearts?
